

# Utah Fact Sheet

## Who We Are

Kinder Morgan is the largest energy infrastructure company in North America. We own an interest in or operate approximately 84,000 miles of pipelines and 180 terminals. Our pipelines transport natural gas, refined petroleum products, crude oil, carbon dioxide (CO<sub>2</sub>) and more. We also store or handle a variety of products and materials at our terminals such as gasoline, jet fuel, ethanol, coal, petroleum coke and steel. In most of our businesses we operate like a giant toll road and receive a fee for our services, generally avoiding commodity price risk.

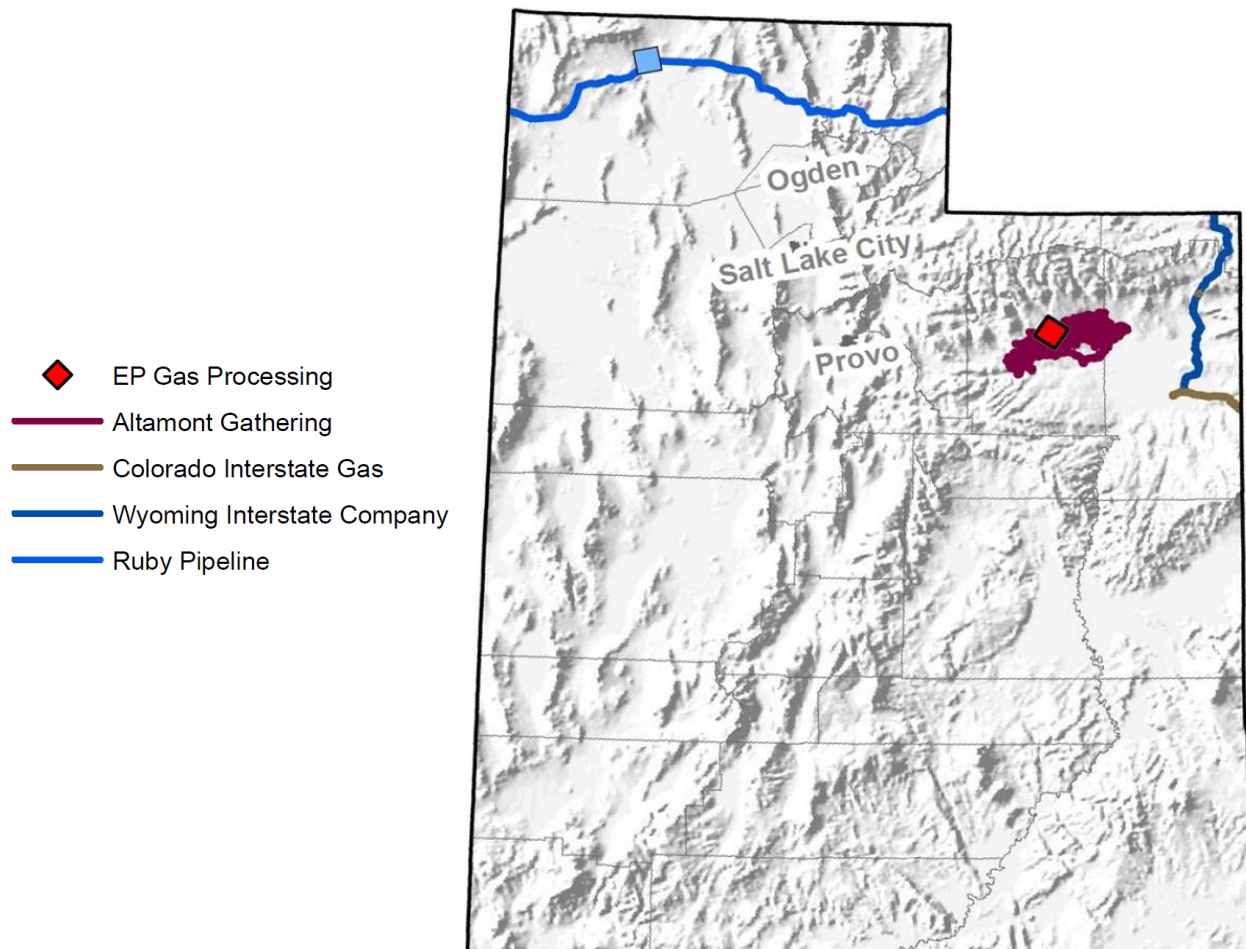

Kinder Morgan is committed to being a good corporate citizen and conducting ourselves in an ethical and responsible manner. We spend hundreds of millions of dollars each year on integrity management and maintenance programs to operate our assets safely and to protect the public, our employees, contractors and the environment.

## Our Economic Impact in Utah

- »We employed 43 people in 2015.
- »We maintained a payroll of over \$3.4 million in 2015.
- »We paid approximately \$10.4 million to local and state taxing bodies in 2015.

## Our Operations in Utah

Kinder Morgan operates approximately 920 miles of pipeline in Utah. Kinder Morgan owns assets in six counties in Utah: Box Elder, Cache, Daggett, Duchesne, Rich and Uintah.

### **Ruby Pipeline LLC**

Ruby Pipeline, owned and operated by Kinder Morgan, is a 680-mile, 42-inch diameter pipeline system that extends from Wyoming to Oregon providing natural gas supplies from the major Rocky Mountain basins to consumers in California, Nevada and the Pacific Northwest.

### **Kinder Morgan Midstream's Altamont System**

The Altamont System gathers casinghead gas from wells in the Altamont, Bluebell, Blacktail Ridge and Central Basin oil fields of the Uintah Basin in Duchesne and Uintah counties of northeast Utah. Altamont consists of over 600 miles of low-pressure gas gathering pipelines, 40,000 horsepower of compression, a 60 million cubic feet per day natural gas liquids recovery plant (currently being expanded to 80 million cubic feet per day), and a 5,600 barrel per day fractionator processing NGLs.

**Wyoming Interstate** Wyoming Interstate Company (WIC) is owned and operated by Kinder Morgan. With approximately 800 miles of pipeline, WIC is comprised of a mainline system that extends from western Wyoming to northeast Colorado (the Cheyenne Hub) and several lateral pipeline systems that extend from various interconnections along the WIC mainline into western Colorado and northeast Wyoming and into eastern Utah.

**Colorado Interstate Gas Pipeline** Kinder Morgan owns and operates Colorado Interstate Gas (CIG) - a 4,300 mile pipeline system that transports natural gas from production areas in the U.S. Rocky Mountains and the Anadarko Basin directly to customers in Colorado and Wyoming, and indirectly to the midwest, southwest, California and Pacific Northwest.
